

Thorpe North & Western, LLP Attorney Docket No. 20308.CON4 Pat. App. SN: 10/765,463
---

**REMARKS**

Applicant thanks the Examiner for consideration of the subject patent application. In the office action mailed September 21, 2005, Claims 1-20 were pending, and made subject to a species election requirement under 35 U.S.C. § 121. Particularly, the Examiner indicated that Claims 1-20 contained four patentably distinct species of compound that could be combined with testosterone in the claimed formulations, namely: 1) dehydroepiandrosterone; 2) melatonin, 3) progesterone, and 4) oxytocin. By the present election, Applicant has elected Species 3, progesterone. A review of Claims 1-20 reveals that Claims 1-10, 16-17, and 20 are readable on this species. Accordingly, Claims 1-10, 16-17, and 20 remain pending for consideration in the present application and Claims 11-15, and 18-19 are withdrawn.
